Volume 220 1994

Table of contents

No. 1 1– 282 issued on February 15, 1994
No. 2 283– 644 issued on March 1, 1994
No. 3 645–1038 issued on March 15, 1994

Corrections 1037

Contents of Volume 220 I–XI

Review

X-ray crystal structures of cytosolic glutathione *S*-transferases – Implications for protein architecture, substrate recognition and catalytic function
Heini Dirr, Peter Reinemer, Robert Huber 645–661

Molecular cell biology and metabolism

pH-dependent processing of yeast procarboxypeptidase Y by proteinase A *in vivo* and *in vitro*
Susanne O. Sørensen, H. Bart van den Hazel, Morten C. Kielland-Brandt, Jakob R. Winther 19–27

Location of agonist-dependent-phosphorylation sites in the third intracellular loop of muscarinic acetylcholine receptors (m2 subtype)
Hiroko Nakata, Kimihiko Kameyama, Kazuko Haga, Tatsuya Haga 29–36

ATP-independent DNA renaturation catalyzed by a protein from *Ustilago maydis*
Allyson D. Cole, Eric B. Kmiec 75–82

A family of hexosephosphate mutases in *Saccharomyces cerevisiae*
Eckhard Boles, Wolfgang Liebetrau, Michael Hofmann, Friedrich K. Zimmermann 83–96

Protein organization in the matrix of leaf peroxisomes – A multi-enzyme complex involved in photorespiratory metabolism
Ralf Heupel, Hans Walter Heldt 165–172

Increased thermal aggregation of proteins in ATP-depleted mammalian cells
Van Trung Nguyen, Olivier Bensaude 239–246

Enhancement by lipoprotein-free plasma of the inhibitory effect of endotoxin on endocytotic catabolism of low density lipoproteins in Hep G2 cells
Wei Liao, Claes-Henrik Florén 349–357

Cell-cycle-regulated phosphorylation of oncoprotein 18 on Ser16, Ser25 and Ser38
Göran Brattsand, Ulrica Marklund, Karin Nylander, Göran Roos, Martin Gullberg 359–368

Origin of carbon atoms of biotin – ^{13}C-NMR studies on biotin biosynthesis in *Escherichia coli*
Ohji Ifuku, Hiroaki Miyaoka, Nobuyoshi Koga, Jiro Kishimoto, Shin-ichirou Haze, Youji Wachi, Masahiro Kajiwara 585–591

Characterization of the ATP-dependent leukotriene C_4 export carrier in mastocytoma cells
Inka Leier, Gabriele Jedlitschky, Ulrike Buchholz, Dietrich Keppler 599–606

Evidence that the recently discovered high-energy nucleotide derivative, oligo-(phosphoglyceroyl-ATP) forms the end chains of purinogen, a complex polymeric major storage form of adenine nucleotide and phosphate in heart
Brinda Patel, Mary Sarcina, John Mowbray 663–669

Redox control of β-oxidation in rat liver mitochondria
Simon Eaton, Douglass M. Turnbull, Kim Bartlett 671–681

Human β1,4 galactosyltransferase and α2,6 sialyltransferase expressed in *Saccharomyces cerevisiae* are retained as active enzymes in the endoplasmic reticulum
Christian H. Krezdorn, Ralf B. Kleene, Manfred Watzele, Svetoslav X. Ivanov, Cornelis H. Hokke, Johannis P. Kamerling, Eric G. Berger 809–817

Characterization of a 100-kDa heat-stable microtubule-associated protein from higher plants
Marylin Vantard, Christine Peter, Arlette Fellous, Paul Schellenbaum, Anne-Marie Lambert 847–853

Nucleic acids, protein synthesis and molecular genetics

Identification of a ligand-binding site of the human endothelin-A receptor and specific regions required for ligand selectivity
Miki Adachi, Yasuhiro Furuichi, Chikara Miyamoto 37–43

A common response element mediates differential effects of phorbol esters and forskolin on type-1 plasminogen activator inhibitor gene expression in human breast carcinoma cells
Helle Knudsen, Tina Olesen, Andrea Riccio, Paola Ungaro, Lise Christensen, Peter A. Andreasen 63–74

Preparation of cyclic 2′,3′-monophosphates of oligoadenylates (A2′p)$_n$A>p and A3′p(A2′p)$_{n-1}$A>p
Edward I. Budowsky, Elena N. Kayushina, Andrew K. Tarasov, Svetlana A. Orlenko, Igor A. Cherkasov, Alexander E. Gavrilov, Yuri A. Strelenko 97–104

Light-activated cleavage of DNA by cobalt-bleomycin
Karl P. Nightingale, Keith R. Fox 173–181

Liver-specific DNase I-hypersensitive sites and DNA methylation pattern in the promoter region of a 6-phosphofructo-2-kinase/fructose 2,6-bisphosphatase gene
Pascale L. N. Zimmermann, Guy G. Rousseau 183–191

Characterization of *in-vitro*-translated human regulatory and catalytic subunits of cAMP-dependent protein kinases
Kari Bente Foss, Brynjar Landmark, Bjørn Steen Skålhegg, Kjetil Taskén, Egil Jellum, Vidar Hansson, Tore Jahnsen 217–223

The upstream region of the gene for the pathogenesis-related protein 1a from tobacco responds to environmental as well as to developmental signals in transgenic plants
Rose Grüner, Ursula M. Pfitzner 247–255

Cloning, chromosomal location and functional expression of the human voltage-dependent calcium-channel β3 subunit
Thibault Collin, Philippe Lory, Sylvie Taviaux, Christophe Courtieu, Pierre Guilbault, Philippe Berta, Joël Nargeot 257–262

Transcriptional regulatory regions for expression of the rat pyruvate kinase M gene
Ziyuan Wang, Masaru Takenaka, Enyu Imai, Kazuya Yamada, Takehiko Tanaka, Tamio Noguchi 301–307

The interferon-stimulated gene 54 K promoter contains two adjacent functional interferon-stimulated response elements of different strength, which act synergistically for maximal interferon-α inducibility
Hans A. R. Bluyssen, Remko J. Vlietstra, Angelique van der Made, Jan Trapman 395–402

Sequence comparison of a segment of the gene for 3-hydroxy-3-methylglutaryl-coenzyme A reductase in zygomycetes
Anke Burmester, Katrin Czempinski 403–408

Triple-helix formation interferes with the transcription and hinged DNA structure of the interferon-inducible 6-16 gene promoter
Christian Roy 493–503

Cloning and nucleotide sequence of the *Pseudomonas aeruginosa* glucose-selective OprB porin gene and distribution of OprB within the family *Pseudomonadaceae*
John L. Wylie, Elizabeth A. Worobec 505–512

Molecular characterisation of the enolase gene from the human malaria parasite *Plasmodium falciparum* – Evidence for ancestry within a photosynthetic lineage
Martin Read, Karen E. Hicks, Paul F. G. Sims, John E. Hyde 513–520

Biosynthesis of casein kinase II in lymphoid cell lines
Bernhard Lüscher, David W. Litchfield 521–526

Transcription of the rat dopamine-D2-receptor gene from two promoters
Olivier Valdenaire, Philippe Vernier, Marion Maus, Jean-Baptiste Dumas Milne Edwards, Jacques Mallet 577–584

High-level expression of the truncated α chain of human high-affinity receptor for IgE as a soluble form by baculovirus-infected insect cells – Biochemical characterization of the recombinant product
Shintaro Yagi, Mitsuaki Yanagida, Isei Tanida, Akira Hasegawa, Ko Okumura, Chisei Ra 593–598

Cloning and functional expression of poly (ADP-ribose) polymerase cDNA from *Sarcophaga peregrina*
Mitsuko Masutani, Tadashige Nozaki, Yoshiaki Hitomi, Miyoko Ikejima, Koichi Nagasaki, Alessandra Carcereri De Prati, Shoichi Kurata, Shunji Natori, Takashi Sugimura, Hiroyasu Esumi 607–614

Molecular cloning and nucleotide sequence of chicken avidin-related genes 1–5
Riitta A. Keinänen, Mika J. Wallén, Paula A. Kristo, Mikko O. Laukkanen, Tarja A. Toimela, Merja A. Helenius, Markku S. Kulomaa 615–621

Structure and expression of the gene for the prothoracicotropic hormone of the silkmoth *Bombyx mori*
Takashi Adachi-Yamada, Masafumi Iwami, Hiroshi Kataoka, Akinori Suzuki, Hironori Ishizaki 633–643

Regulation of transferrin receptor mRNA expression – Distinct regulatory features in erythroid cells
Roxanne Y. Y. Chan, Christian Seiser, Herbert M. Schulman, Lukas C. Kühn, Prem Ponka 683–692

Isolation and expression of a gene specifying a *cdc2*-like protein kinase from the human malaria parasite *Plasmodium falciparum*
Petra B. Ross-Macdonald, Ralph Graeser, Barbara Kappes, Richard Franklin, Donald H. Williamson 693–701

Thermodynamic stability and solution conformation of tandem G · A mismatches in RNA and RNA · DNA hybrid duplexes
Susanne Ebel, Tom Brown, Andrew N. Lane 703–715

Properties of multiple G · A mismatches in stable oligonucleotide duplexes
Andrew Lane, Susanne Ebel, Tom Brown 717–727

Heterogeneity of the rat NADH-cytochrome-b_5-reductase transcripts resulting from multiple alternative first exons
Luisa Mota Vieira, Jean-Claude Kaplan, Axel Kahn, Alena Leroux 729–737

Escherichia coli elongation-factor-Tu mutants with decreased affinity for aminoacyl-tRNA
Carsten Andersen, Ove Wiborg 739–744

Threonyl-tRNA synthetase from yeast – Discrimination of 19 amino acids in aminoacylation of $tRNA^{Thr}$-C-C-A and $tRNA^{Thr}$-C-C-A(2′NH_2)
Wolfgang Freist, Hans Sternbach, Friedrich Cramer 745–752

A human POU domain gene, *mPOU*, is expressed in developing brain and specific adult tissues
Eva Wey, Gary E. Lyons, Beat W. Schäfer 753–762

Structural analysis of the functional gene and pseudogene encoding the murine granulocyte colony-stimulating-factor receptor
Yasuhiko Ito, Yoshiyuki Seto, Camilynn I. Brannan, Neal G. Copeland, Nancy A. Jenkins, Rikiro Fukunaga, Shigekazu Nagata 881–891

Translocation and processing of various human parathyroid hormone peptides in *Escherichia coli* are differentially affected by protein-A-signal-sequence mutations
B. Najma Kareem, Erik Rokkones, Anders Høgset, Erik Holmgren, Kaare M. Gautvik 893–900

Molecular cloning and sequence analysis of the gene of the molybdenum-containing aldehyde oxido-reductase of *Desulfovibrio gigas* – The deduced amino acid sequence shows similarity to xanthine dehydrogenase
Ulrich Thoenes, Orfeu L. Flores, Ana Neves, Bart Devreese, Jozef J. Van Beeumen, Robert Huber, Maria J. Romão, Jean Le Gall, José J. G. Moura, Claudina Rodrigues-Pousada 901–910

Control of cellular iron homeostasis by iron-responsive elements *in vivo*
Roberta J. Ward, Lukas C. Kühn, Pierre Kaldy, Anne Florence, Timothy J. Peters, Robert R. Crichton 927–931

Characterisation and mode of *in vitro* replication of pea chloroplast *OriA* sequences
Malireddy K. Reddy, Nirupam Roy Choudhury, Dhirendra Kumar, Sunil K. Mukherjee, K. K. Tewari 933–941

Analysis of genes encoding highly conserved lysine-rich proteins in *Aplysia californica* and *Saccharomyces cerevisiae*
Daniel Auclair, B. Franz Lang, Pierre Forest, Luc DesGroseillers 997–1003

Protein chemistry and structure

Complex formation between protein C inhibitor and prostate-specific antigen *in vitro* and in human semen
Anders Christensson, Hans Lilja 45–53

Purification, characterization, primary structure, crystallization and preliminary crystallographic study of a serine proteinase from *Streptomyces fradiae* ATCC 14544
Kengo Kitadokoro, Hiroshige Tsuzuki, Etsuo Nakamura, Tomohiro Sato, Hiroshi Teraoka 55–61

Induction by zinc of specific metallothionein isoforms in human monocytes
Martine Pauwels, Johan Van Weyenbergh, Ann Soumillion, Paul Proost, Marc De Ley 105–110

Solution structure of seminal plasmin in the presence of micelles
Till Maurer, Heinz Rüterjans 111–116

Involvement of a lysine residue in the N-terminal Ni^{2+} and Cu^{2+} binding site of serum albumins – Comparison with Co^{2+}, Cd^{2+} and Al^{3+}
Peter J. Sadler, Alan Tucker, John H. Viles 193–200

Conservation analysis and structure prediction of the protein serine/threonine phosphatases – Sequence similarity with diadenosine tetraphosphatase from *Escherichia coli* suggests homology to the protein phosphatases
Geoffrey J. Barton, Patricia T. W. Cohen, David Barford 225–237

Hydrophobic interaction at the subunit interface contributes to the thermostability of 3-isopropylmalate dehydrogenase from an extreme thermophile, *Thermus thermophilus*
Hiromi Kirino, Makoto Aoki, Miho Aoshima, Yumiko Hayashi, Masayuki Ohba, Akihiko Yamagishi, Takayoshi Wakagi, Tairo Oshima 275–281

Molecular organization at the glycoprotein-complex-binding site of dystrophin – Three dystrophin-associated proteins bind directly to the carboxy-terminal portion of dystrophin
Atsushi Suzuki, Mikiharu Yoshida, Kensuke Hayashi, Yuji Mizuno, Yasuko Hagiwara, Eijiro Ozawa 283–292

The carboxy-terminal peptide of detyrosinated α tubulin provides a minimal system to study the substrate specificity of tubulin–tyrosine ligase
Manfred Rüdiger, Jürgen Wehland, Klaus Weber 309–320

Spectrochemical evidence for the presence of a tyrosine residue in the allosteric site of glucosamine-6-phosphate deaminase from *Escherichia coli*
Myriam M. Altamirano, Andrés Hernandez-Arana, Salvador Tello-Solis, Mario L. Calcagno 409–413

NMR and circular dichroic studies of the solution structure of conformationally constrained antigenic peptides
Bénédicte Prêcheur, Marc Bossus, Hélène Gras-Masse, Eric Quiniou, André Tartar, Constantin T. Craescu 415–425

Resonance assignment, cysteine-pairing elucidation and secondary-structure determination of capsicein, an α-elicitin, by three-dimensional ^{1}H NMR
Serge Bouaziz, Carine van Heijenoort, Eric Guittet, Jean-Claude Huet, Jean-Claude Pernollet 427–438

A purified ferredoxin from *Giardia duodenalis*
Steven M. Townson, Graeme R. Hanson, Jacqueline A. Upcroft, Peter Upcroft 439–446

Tandem overproduction and characterisation of the nuclease domain of colicin E9 and its cognate inhibitor protein Im9
Russell Wallis, Ann Reilly, Karen Barnes, Chris Abell, David G. Campbell, Geoffrey R. Moore, Richard James, Colin Kleanthous 447–454

Elucidation of the structure of SA-FF22, a lanthionine-containing antibacterial peptide produced by *Streptococcus pyogenes* strain FF22
Ralph W. Jack, Alan Carne, Jörg Metzger, Stefan Stefanović, Hans-Georg Sahl, Günther Jung, John Tagg 455–462

Isolation and characterization of a small putative zinc finger protein from cuttlefish epididymal sperm cells
Annie Martin-Ponthieu, Danièle Wouters-Tyrou, Barbara Pudlo, Eric Buisine, Pierre Sautière 463–468

X-ray crystallographic and calorimetric studies of the effects of the mutation Trp59→Tyr in ribonuclease T1
Wolf-Dieter Schubert, Gerd Schluckebier, Jan Backmann, Joachim Granzin, Caroline Kisker, Hui-Woog Choe, Ulrich Hahn, Wolfgang Pfeil, Wolfram Saenger 527–534

Investigating the role of conserved residue Asp134 in *Escherichia coli* ribonuclease HI by site-directed random mutagenesis
Mitsuru Haruki, Eriko Noguchi, Chieko Nakai, Yu-Ying Liu, Motohisa Oobatake, Mitsuhiro Itaya, Shigenori Kanaya 623–631

The nuclear-magnetic-resonance solution structure of the mutant α-amylase inhibitor [R19L]Tendamistat and comparison with wild-type Tendamistat
John F. O'Connell, Rudolf Bender, Joachim W. Engels, Klaus-P. Koller, Mathias Scharf, Kurt Wüthrich 763–770

Human tumor necrosis factor mutants with preferential binding to and activity on either the R55 or R75 receptor
Xaveer Van Ostade, Peter Vandenabeele, Jan Tavernier, Walter Fiers 771–779

pH-induced structural changes in human serum apotransferrin – pK_a values of histidine residues and N-terminal amino group determined by ^{1}H-NMR spectroscopy
Gina Kubal, Peter J. Sadler, Alan Tucker 781–787

The type-III Fc receptor from *Streptococcus dysgalactiae* is also an α_2-macroglobulin receptor
Hans Jonsson, Hans-Peter Müller 819–826

Mössbauer and magnetic susceptibility studies on iron(II) metallothionein from rabbit liver – Evidence for the existence of an unusual type of $[M_3(CysS)_9]^{3-}$ cluster
Xiao-Qi Ding, Christian Butzlaff, Eckhard Bill, Dean L. Pountney, Gerald Henkel, Heiner Winkler, Milan Vašák, Alfred Xaver Trautwein 827–837

Isolation of transcription factor IIIC from *Dictyostelium discoideum*
Monika Bukenberger, Theodor Dingermann, Wolfgang Meissner, Klaus H. Seifart, Thomas Winckler 839–846

Comparative studies on the primary structures and inhibitory properties of subtilisin-trypsin inhibitors from *Streptomyces*
Seiichi Taguchi, Shuichi Kojima, Mahito Terabe, Kin-ichiro Miura, Haruo Momose 911–918

Characterization of a membrane glycoprotein having pharmacological and biochemical properties of an AT2 angiotensin II receptor from human myometrium
Daniel Lazard, Phi Villageois, Malène M. Briend-Sutren, Françoise Cavaillé, Serge Bottari, A. Donny Strosberg, Clara Nahmias 919–926

Protein stabilization by hydrophobic interactions at the surface
Bertus van den Burg, Bauke W. Dijkstra, Gert Vriend, Bernard van der Vinne, Gerard Venema, Vincent G. H. Eijsink 981–985

Primary sequence, oxidation-reduction potentials and tertiary-structure prediction of *Desulfovibrio desulfuricans* ATCC 27774 flavodoxin
Jorge Caldeira, P. Nuno Palma, Manuela Regalla, Jorge Lampreia, Juan Calvete, Wolfram Schäfer, Jean Le Gall, Isabel Moura, José J. G. Moura 987–995

All potential glycosylation sites of the nicotinic acetylcholine receptor δ subunit from *Torpedo californica* are utilized
Andreas Strecker, Peter Franke, Christoph Weise, Ferdinand Hucho 1005–1011

Enzymology

Purification and characterization of the periplasmic nitrate reductase from *Thiosphaera pantotropha*
Ben C. Berks, David J. Richardson, Carol Robinson, Ann Reilly, Robin T. Aplin, Stuart J. Ferguson 117–124

Posttranslational modification of nitrogenase – Differences between the purple bacterium *Rhodospirillum rubrum* and the cyanobacterium *Anabaena variabilis*
Jörg Durner, Ines Böhm, Helmuth Hilz, Peter Böger 125–130

Prothrombin activation on dioleoylphosphatidylcholine membranes
José W. P. Govers-Riemslag, Marie P. Janssen, Robert F. A. Zwaal, Jan Rosing 131–138

H_2: heterodisulfide oxidoreductase complex from *Methanobacterium thermoautotrophicum* – Composition and properties
Edgar Setzke, Reiner Hedderich, Stefanie Heiden, Rudolf K. Thauer 139–148

Effects of pH on carboxypeptidase-Y-catalyzed hydrolysis and aminolysis reactions
Ulla Christensen 149–153

Purification and characterisation of a water-soluble ferrochelatase from *Bacillus subtilis*
Mats Hansson, Lars Hederstedt 201–208

Recombinant human casein kinase II – A study with the complete set of subunits (α, α' and β), site-directed autophosphorylation mutants and a bicistronically expressed holoenzyme
Ludger Bodenbach, Jürgen Fauss, Andrea Robitzki, Andreas Krehan, Peter Lorenz, Frederick J. Lozeman, Walter Pyerin 263–273

Structure and expression of a gene coding for thermostable α-glucosidase with a broad substrate specificity from *Bacillus* sp. SAM1606
Masahiro Nakao, Toru Nakayama, Akemi Kakudo, Misa Inohara, Masami Harada, Fumihiko Omura, Yuji Shibano 293–300

The oligosaccharides of the Fe(III)-Zn(II) purple acid phosphatase of the red kidney bean – Determination of the structure by a combination of matrix-assisted laser desorption/ionization mass spectrometry and selective enzymic degradation
Bernd Stahl, Thomas Klabunde, Herbert Witzel, Bernt Krebs, Martin Steup, Michael Karas, Franz Hillenkamp 321–330

Triose-phosphate isomerase of *Leishmania mexicana mexicana* – Cloning and characterization of the gene, overexpression in *Escherichia coli* and analysis of the protein
Linda Kohl, Mia Callens, Rik K. Wierenga, Fred R. Opperdoes, Paul A. M. Michels 331–338

Endoglycosidic cleavage of branched polymers by poly(ADP-ribose) glycohydrolase
Stephan A. Braun, Phyllis L. Panzeter, Margaret A. Collinge, Felix R. Althaus 369–375

Maturation of the large subunit (HYCE) of *Escherichia coli* hydrogenase 3 requires nickel incorporation followed by C-terminal processing at Arg537
Reinhild Rossmann, Martin Sauter, Friedrich Lottspeich, August Böck 377–384

Transport of citrate catalyzed by the sodium-dependent citrate carrier of *Klebsiella pneumoniae* is obligatorily coupled to the transport of two sodium ions
Juke S. Lolkema, Hans Enequist, Michel E. van der Rest 469–475

Formylmethanofuran dehydrogenases from methanogenic Archaea – Substrate specificity, EPR properties and reversible inactivation by cyanide of the molybdenum or tungsten iron-sulfur proteins
Peter A. Bertram, Marion Karrasch, Ruth A. Schmitz, Reinhard Böcher, Simon P. J. Albracht, Rudolf K. Thauer 477–484

Nucleotide binding by multienzyme peptide synthetases
Maja Pavela-Vrancic, Henk van Liempt, Eva Pfeifer, Wolfgang Freist, Hans von Döhren 535–542

Characterization of aromatic aminotransferases from the hyperthermophilic archaeon *Thermococcus litoralis*
Giuseppina Andreotti, Maria Vittoria Cubellis, Gianpaolo Nitti, Giovanni Sannia, Xuhong Mai, Gennaro Marino, Michael W. W. Adams 543–549

Purification and partial characterization of a putative thymidylate synthase from *Methanobacterium thermoautotrophicum*
Ute E. Krone, Sara C. McFarlan, Harry P. C. Hogenkamp 789–794

The amine-donor substrate specificity of tissue-type transglutaminase – Influence of amino acid residues flanking the amine-donor lysine residue
Patricia J. T. A. Groenen, Ronald H. P. H. Smulders, Roderick F. R. Peters, Johan J. Grootjans, Paul R. L. A. van den Ijssel, Hans Bloemendal, Wilfried W. de Jong 795–799

The I-*Ceu*I endonuclease: purification and potential role in the evolution of *Chlamydomonas* group I introns
Philip Marshall, Ted B. Davis, Claude Lemieux 855–859

Possible kinetic mechanism of human placental alkaline phosphatase *in vivo* as implemented in reverse micelles
Gu-Gang Chang, Shu-Li Shiao 861–870

Purification of 1,3-β-D-glucan synthase activity from pea tissue – Two polypeptides of 55 kDa and 70 kDa copurify with enzyme activity
Kanwarpal Singh Dhugga, Peter M. Ray 943–953

Coordination of catalytic activities within enzyme complexes
Nicolas Kellershohn, Jacques Ricard 955–961

Activation of the retinal cGMP-specific phosphodiesterase by the GDP-loaded α-subunit of transducin
Mikhail Kutuzov, Claude Pfister 963–971

Photolabeling of soybean microsomal membrane proteins with photoreactive acyl-CoA analogs
Ram Rajasekharan, Vasanthi Nachiappan, Hiranya S. Roychowdhury 1013–1018

Carbohydrates, lipids and other natural products

Characterization of the lipopolysaccharide of *Moraxella catarrhalis* – Structural analysis of the lipid A from *M. catarrhalis* serotype A lipopolysaccharide
Hussein Masoud, Malcolm B. Perry, James C. Richards 209–216

Identification of a major poly-*N*-acetyllactosamine-containing cell-surface glycoprotein of mouse teratocarcinoma cells – Appearance on cells induced to primitive endoderm but not parietal endoderm differentiation
Dorothe Spillmann, Jukka Finne 385–394

Cross-reactivity between the mannan of *Candida* species, *Klebsiella* K24 polysaccharide and *Salmonella* C_1 and E O-antigens is mediated by a terminal non-reducing β-mannosyl residue
Ndubisi A. Nnalue, Andrej Weintraub, Stefan Oscarson, Alf A. Lindberg 973–979

Membranes and bioenergetics

The requirement of matrix ATP for the import of precursor proteins into the mitochondrial matrix and intermembrane space
Rosemary A. Stuart, Albrecht Gruhler, Ida van der Klei, Bernard Guiard, Hans Koll, Walter Neupert 9–18

The role of electrostatic charge in the membrane insertion of colicin A – Calculation and mutation
Jeremy H. Lakey, Michael W. Parker, Juan M. González-Mañas, Denis Duché, Gert Vriend, Daniel Baty, Franc Pattus 155–163

Pore formation in artificial membranes by the secreted hemolysins of *Proteus vulgaris* and *Morganella morganii*
Roland Benz, Kim R. Hardie, Colin Hughes 339–347

Two human melanoma cell-line variants with enhanced *in vivo* tumor growth and metastatic capacity do not express the β_3 integrin subunit
Habib Boukerche, Miloud Benchaibi, Odile Berthier-Vergnes, Gerard Lizard, Maryse Bailly, Mireille Bailly, John L. McGregor 485–491

Disruption of the gene encoding the NADH-binding subunit of NADH:ubiquinone oxidoreductase in *Neurospora crassa* – Formation of a partially assembled enzyme without FMN and the iron-sulphur cluster N-3
Wolfgang Fecke, Vladimir D. Sled, Tomoko Ohnishi, Hanns Weiss 551–558

Reconstitution of the myometrial oxytocin receptor into proteoliposomes – Dependence of oxytocin binding on cholesterol
Uwe Klein, Falk Fahrenholz 559–567

The C-terminus of the 14-kDa subunit of ubiquinol-cytochrome-*c* oxidoreductase of the yeast *Saccharomyces cerevisiae* is involved in the assembly of a functional enzyme
Wieger Hemrika, Marian de Jong, Jan A. Berden, Leslie A. Grivell 569–576

In vivo and *in vitro* photoinhibition reactions generate similar degradation fragments of D1 and D2 photosystem-II reaction-centre proteins
Catherine Ann Shipton, James Barber 801–808

Direct analysis and significance of cardiolipin transverse distribution in mitochondrial inner membranes
Jean-Michel Petit, Olivier Huet, Paul François Gallet, Abderrahman Maftah, Marie-Hélène Ratinaud, Raymond Julien 871–879

Phospholipid binding and transfer by the nonspecific lipid-transfer protein (sterol carrier protein 2) – A kinetic model
Theodorus W. J. Gadella Jr, Karel W. A. Wirtz 1019–1028

Regulation of the erythrocyte Ca^{2+}-ATPase at high pH
Paulo Cesar de Carvalho-Alves, Monica M. Freire, Hector Barrabin, Helena M. Scofano 1029–1036

Indexed in *Current Contents*
